

Valvole e componenti per impianti termici, idrosanitari, industria e agricoltura • Isolatori e accessori per trasformatori ed apparecchiature elettromeccaniche
Valves and components for heating and sanitary systems, industry and agriculture • Insulators and fittings for transformers and electromechanical equipments

QUALITY and ENVIRONMENTAL POLICY

Barberi Rubinetterie Industriali S.r.l. is leader in the design, production and sales of valves and components for heating, industry, agriculture and production and sales of accessories for electrical machines. It has the aim to:

- guarantee and increase the quality of its products and the satisfaction of its customers
- to demonstrate the evidence of the search for continuous improvement, to prevent pollution and to respect all applicable legal prescriptions and other prescriptions which our company decides to apply, which are linked with environmental aspects.

Furthermore, the company has put in place within its proper company structure a Quality System conform to the prescriptions of the norm UNI EN ISO 9001:2008 and a System for the Managing of the Environment in conformity to the prescriptions of the norm UNI EN ISO 14001:2004.

Due to the requests from the market as well as the aim of the company to propose strongly competitive products which guarantees a high degree of long term customers, it is the intention to activate continuous improvement programs concerning environmental issues and energy saving. The management of **Barberi Rubinetterie Industriali S.r.l.** has identified some goals which they believe to be fundamental in order to guarantee the actualisation of a valid Quality and Environment Policy.

The goals concerning Quality are in particular:

- Constant search to increase the quality of the products and service offered to the customers
- Flexibility towards the needs of the customers
- Maintaining the agreed delivery time
- Maximise the productivity
- Selection of strategic sub-suppliers

The goals concerning Environment are in particular:

- Education of the workers concerning environmental aspects, especially the differential waste gathering
- Environmental issues are part of the evaluation plan for the qualification of the sub-suppliers
- Evaluation of renewable energy sources
- Introduction of elements linked with the concern for the environment when making new projects

In order to be sure that these Policy are understood, applied and supported at all levels within the company, the management of **Barberi Rubinetterie Industriali S.r.l.** takes the responsibility to divulgate this present declaration to all the personal by exposing it on the information board of the company, inform the personal about it and make it available to the public and to all interested parties.

Furthermore, at least once a year, when re-examining the Quality and Environmental control Management, the board will re-evaluate the contents of the Policy in order to see if they are according to changes in legislations, markets or within the company itself.
